**Dr. Marcelo Alves  
De Paula Lima**  
School of Social Sciences,  
Arts and Humanities (SSAH),  
Al Akhawayn University

This talk examines the intersection of Artificial Intelligence and the Global South, engaging with technological and epistemic monopoly over the production of AI from a Global South perspective. Current AI paradigms, built on foreign datasets and value systems, risks perpetuating a new form of epistemological exclusion for countries like Morocco. This talk frames AI as a contested space where the Global South must not only participate but also lead in defining its future..

***Friday 28th November 2025 Time : 3.00 Red Amphitheater,  
Economics and Management Sciences  
Ibn Tofail University , Kenitra , Morocco***
